

### Professional Goal

As an educator my goal is to continue to improve my teaching in order to enhance student learning and comprehension. Through the pursuit of my Master's Degree from Michigan State I hope to develop the skills I need to guide my students towards comprehensions of knowledge. Through the study of science education and educational technology I will develop the skills necessary to lead my students through the exploration of content and acquisition of investigative skills.

### Education

Michigan State University  
Master of Arts in Education  
Focus area: Science Education  
Certification in Educational Technology  
2017
